decisions YOU should have shared?

Today, more than ever before people are thinking and doing something about the future.

Among those concerns for the future is the matter of their plans for their funeral,

The Ontario Funeral Service Association respectfully sug-gests that it is a good idea to visit your Funeral Director, and together talk these matters over quietly and calmly.

He can help you with information as to the different ser vices and their costs, and then he will confirm your arrange ments in writing so that your family will know what you want

Trenton, Ameliasburgh, Sidney and Prince
Edward County councils have all gone on record
as opposing the existing Bay Bridge site, with
the consensus being that an extension of the Wallbridge-Loyalist Road over the bay would be

land.

What we want to know, if that is the case, is why the original bay skyway was built at Marywille instead of Belleville?

At 1967 prices, that structure cost \$\$\frac{1}{2}\$ million to span 2,780 feet, and Ad. Meels can convincingly Illustrate how a Wallbridge Road bridge would soar faculty, as well as physically.

Minister John Rhodes estimated that a new akyway might cost 310 million, he was thinking in terms of locating it on the existing Bay Bridge sife. As Add. Meeks points out, as past blane could be as since as 1500 Feet, and there existing causeway outde be used as an approach, and land acquisition codes would be minimal.

If this is starting to look expensive, wait until you are the south side of the Prince Edward plan which, ectonomy-wise, resembles the south side of a horse.

"That shoreline is pretty expensive property. Id bet it would cost a million alone," conjectures Ald. Meeks.

jectures Ald. Meeks.

Then, between the south shore and the proposed Jackson's Hill hook-up with Highway 14
due south, there lies 7,000 feet of prime farmland to be crossed — at a price — and 3,000 feet

After crossing a creek (with another bridge?), Prince Edward's route winds up 15,000 feet — and a gold mine — from where it began. "I don't see how Jim Taylor could justify, from a tax doltar point of view, putting a bridge there," and Alids Meeks.

Other Arguments

There are more than economical arguments for erecting a skyway at the long-anticipated Belleville site.

"A baid of 1924 students were enrolled in language fraining at the Commission's inaguage stock outing 1937. Continuous, full-time courses in English and French, upon the course and the students, were interested, Unfortunately, entry into the tealing, symmetric timeous language relating is likely to temporatily interrupt some cyclical students withing programs. Repunded facilities are expected to become available in the fail of 1974, at which ime most cyclical students will be able to resume their regulat there will be able to resume their regulat there years."

Thus, just a suggestion of a spot of bother and inconvenience where achieving facility in two languages, and trying to cope with routine day-to-day job training, are

What reconstruction of the state of the state of the state when all is said and done, life is so much more interesting when a person is fluent in more than one innuage. Clearly, it is in the interest of a lot of people in the work force these days to have the capability, And of course it makes for a more interesting time when travelling abroad.

Making The Scene

To borrow from the jargon of the times,
Canadian women are achieving a "higher
profile" on the contemporary scene.

They are assuming a more active role
in the police, they will be playing a role soon
with the peacekeeping force; in the Middle
East, they are training for service with the
Coast Guard, and they are finding new opemings in the Government. All in all, women

This is how Belleviller steapyears may feet the morning of November 13 when they wake up and discover their municipal election in our point in has even begun.

It has even begun.

That leaves four vacancies, and only four insuperienced newcomers have stated their intentions to sele council seads. It also appears that pobential mayoratry candidates are hedging their plets, with no one ready to step up to offer an alternative to Robin Jestrey.

Council Big Business

Council lies Business

Put it all together and it spells

"A-C-L-A-M-A-T-C-M", an electoral term that
fairly recks of apathy.

There is nothing wrong with new faces, so
long as they belong to people who have some
capacity to manage the affairs of a city of
35,000.

After all, Believille councillors authorised expenditure of some 4.6 million local tax arx this year. Name me a company with a en directors who would handle that responsitions as 2000 becomes in the control of the co

We Need Doers

We Need Doers
There are important problems that require
competent management. What direction will
the \$700,000 Poter property recreational devigoment take? What will the city do to alwage
the transit system from an annual deficit covering the \$200,000 mark? What is city hall going
to do about Belleville's zero availability of
apartment accommodation?

apartment accommodation?

This city can't afford to mark time while council newcomers learn the ropes. Council candidates must either be experienced or fast learners. And we don't need professional gripers

— we need overs.

Another \$2.8 million of Believille tax money went to support the Hastings County Board of Education this year, a \$27 million business with five Believille representatives.

But even on the often-overlooked PUC end
of the builot it would be a healthier situation to
see more names than there are vacancies.

Turnouts Notorious

Civic elections are notorious for their displays of public indifference. Where a federal campaign might prompt a 75 per cent turnout of eligible voters, municipalities like Belleville feel fortunate to draw the 52 per cent we had in

Rehabilitation Week

A point brought out by an advertise-ment about drinking drivers in the United States is that more people have been killed on U.S. highways than in all the wars in which that country has participated.

This dubious link between carnage on highways and wartime hostilities will be an ironic twist in Belleville this com-

Monday.

It will be Remembrance Day and, either by accident or design, this marks opening of Rehabilitation Week at Bellee General Hospital.

Highway accidents will not come up dis-ectly. Never the less the subject of the open-ing day's discussion is Injury — from In-dustrial Accidents and through participa-tion in sports, including, incidentally, recommelling.

anowmobiling.

And allbough highway accidents are not on the official agenda, the subject is in escapable in any discussion of hujury. Indeed one of the medical men taking part in the public presentation on Monday evening is Dr. W. E. Gheni, professor of surgery of constructions, an outspacent selection of the public presentability, an outspacen adventue of said your label, personal suffering and expensive the public presentation of the public presentation of the public presentation of the public presents of the public pre

Bowever, the emphasis, in this particu-lar discussion, beginning Monday morning, is on Industrial Accidents, and, in the at-termoon, on prevention of disability from sports injuries.

On succeeding days of the week the sub-ects will be epilepsy, arthritis, alcoholism, and learning disabilities.

Hard Times

The word recession's haven disores and more in news of the economic altusation in the United States. Indeed Treasury Secretary William Simon has just been quoted as activated property of the control of the states of the states

east.

Meanwhile, a "recession," according to naffy, has been defined as two successive riers of no growth in the gross national fact.

oner.

In Canada the fear is that growth next ar may dip to something like four per nt, but at least that is a few points above to and full scale recession.

Made His Point

It is said that desperate situations re-re desperate remedies. The Manitoba MP pitched a tent on Parliament Hill, out-the Postmaster-General's office, certhe Postmaster-General's office, cerally got his attention. It all had to do with
m of closing of the post office in a comnity in the MP's riding. Well, the MP
de his point, Bryce Mackasey got the
sage, and who knows, something may be
e about it.

Skating and how to enjoy it more

You enjoy skating more in skates that are as comfort-able as shoes And your comfort depends as much on proper fit, as on quality of skates. That's why men, women, girls and boys enjoy skating in skates fitted by Leslie's Ski-Den. Experts fit your skates as com-fortably as they fit Leslie's shoes. With this kind of comfort you skate better. You enjoy skating more. And more skating. Have Leslie's Ski-Den fit you with Bauer or Adidas skates, then see for yourself.

ELLIOTT MOTORS (70) LTD.

Our compact-sized Elan has a compact price. You can handle both.

Think about it.

What you're really after when you by a mowmobile is a way to have fun in the winter. So why not buy a seep thing light. The 1975 Elan from Sti. Joo.

Elan is a real snow machine with a full-length, full width rubber track and a wide aki stance. But it's more compact overall. I Sn most other answernobiles. So,

compared to most other snowmobiles, Elan weighs less, handles easier and does not cost as much. To buy or

not cost as much. To buy or to run.

There are 3 Elan models.
The 250 single cylinder with an improved bogie wheel suspension and your choice of personalized cab decals.
The 250 twin cylinder Deluxe with its super-efficient 5-port engine.
And the Elan 390 SS twin

with 5-port performance and a smooth ground Leveller* slide suspension. See them at your Ski-Doo dealers, Now! Elan '75. Three ways you can afford to make fun of winter.

ne people are already making more than
sugh money. Astrod above already or portion experiences, and the second portion experiences, and the second portion executives, Galbratth said: "It's emany to not only control salaries, but use them."

So how would Mr. Galbraith curt in-ion? With terration; tax those with high-moone, he says, and reduce it for those ower-moome brackets. Is John Turner listening?

Backs To The Wall

By observing that it is later than we ak, concluding some recent observa-us on world famine, it was with the oright in mind that governments are be-ning to lose control of the situation.

Things are abresdy out of control in the Thing Breat abresdy out of control in the Thing Breat, excepting and materially. And in the western world, the "have" nations are uncertain how to go about alleviating the situation, while recognizing its own reserves are not all that impressive.

Noogh for 26 days was one figure men-tioned recently. Seliths attitudes go hand-hand with pregnantism. Such as, who is spoing to pay? And, wen't these people in noof, if restored to more than subsidence level, simply go on perpetuating location than possing the threat strain on a world strained silvandy to the limit?

The stark fact is, millions may simply allowed to die, as the only solution to at is an almost insoluble problem. It's a sic example of, survival of the fittest.

Can you tell the difference between the \$20 Snowbelle and the \$40 leath

If you can't tell which is the Snowbelle and which is the leather/boot, we'd like to point out some of the differences: Snowbelles are inexpensive. Leather isn't. Snowbelles are guaranteed to

keep your feet dry or your money back. Leather leaks.

Snowbelles keep their shape year after year. Leather goes limp.
Snowbelles are made of durable, leather-like vinyl that comes clean with a wipe. Leather stains. Now.

Which is which?

Snowbelles by Kaufman Looks like leather. Worls like viryl.

An extra lens for sharper viewing. That's the whole idea behind our new Panasonic Quintrix tube.

No other color picture tube has it. We put an extra lens into the new Panasonic Quintrix picture tube. To

give you a sharper, brighter picture than ever before.

Television manufacturers put electron lenses in their picture tubes to focus the image. We put in an extra lens to make the focus even sharper.

And because the Quintrix picture tube is mounted on

a more powerful chassis you get a brighter picture too.

Panasonic color portables with the exclusive new

Quintrix tube in five models and three different sizes. From a compact lightweight 14" to the popular 20" sizes. Every one gives you the sharpest, brightest picture eyer. And after all, isn't that the whole idea?

Score 5 for The System.

GM's Maximum Mileage System continues to produce—this time in dollars.

Good news for you about savings in overall operating costs ranging from \$440 to \$1,000 on Chevrolet Impala, Pontiac Catalina, Oldsmobile Delta 88, Buick LeSabre and Cadillac DeVille for '75.

Once again, the new GM Maximum Mileage System has

lived up to our expectations. And as a result, you can realize substantial savings in overall operating costs on each of these cars as compared to last year's models. These impressive savings range from over \$440 on the '75 Impala to more than \$1,00 on the Delta 88 over 50,000 miles of driving...say about 4 year's worth.

How? Through the money you would save on gas and scheduled maintenance costs.

For example, let's compare the 1975 Chevrolet Impala with its-1974 counterpart, Based on Urban Driving Tests conducted by the U.S. Government's Environmental Protection Agency, which emphasize stop-and-go city driving, the '75 Impala, using unleaded gasoline shows about a 10% mileage improvement over the '74 model using leaded fuel. Our own proving ground tests, which include suburban-type driving conditions, confirm this 10% improvement. Over 50,000 miles, that amounts to 315 fewer gallons of gas. If you paid 67.9¢ per gallon, which allows a 3¢ per gallon increase for unleaded fuel over regular fuel, this represents a net savings of \$130 (these calculations could vary depending on the prices of leaded and unleaded fuel in your area).

Now let's compare scheduled maintenance costs. If you followed the owner's manual for recommended service, the '75 Impala with the Maximum Mileage System could save you nearly \$310 on parts, lubricants and labor over the '74 model using leaded

fuel. Since the System features GM's Catalytic Converter, High Energy Ignition, Fast Warm-up Carburetion and Steel-belted Radial Tires, the predominant savings occur in fewer scheduled changes for spark plugs, oil, oil filters and lubrications. And with our Maximum Mileage System, there are no points or ignition condenser to replace. Of course, parts and labor costs will vary throughout the country, but we've used current list prices and figured labor at \$11 per hour.

All together, then, when you add it all up, it amounts to an impressive savings of over \$440 on the Impala and even more on these other cars. Which is another reason why we say that The System is the most advanced engineering and technology we can offer on 1975 General Motors cars.

We want you to drive what you like and like what you drive.

EXPERIENCE - COMMITMENT

Should YOU pre-arrange vour Funeral?

The wise head of every family takes care to prepare a Will and carry ample Life insurance with one unselfish motive in mind—to assure his family of security and peace of mind.

Doesn't it make sense then that one should pre-arrange his funeral and leave instructions as to his wishes?

Generally speaking, should it not be YOUR responsibility to arrange YOUR funeral?

Any member of the Ontario Funeral Service Association will sit down and discuss pre-arrangement with you without obligation. Why leave this task to someone etse?

A message to color television buyers.

Don't be the victim of a selling tactic called "bait and switch."

Over 5,000 retailers sell national brand television sets in Canada. The over-whelming majority are business people of integrity-people you can rely on when purchasing television sets or other home entertainment products. A small number of television dealers, unfortunately, are not responsible representatives of the television retailing profession. These dealers sell national brand television sets through the use of an unfair and, in some instances, illegal selling tactic called "bait and switch." Their purpose, simply stated, is to enrich themselves at the expense of unsuspecting television buyers.

Here's what "bait and switch is, how you can be on guard against it, and how you can help stamp it out altogether.

What is "bait and switch"?

A dealer using "bait and switch" will start by advertising a nationally respected television brand at a very low price, to attract you into his store. The advertised brand may well be a Zenith, because of the high level of public regard the Zenith brand has earned. The advertised set and its low price are the "bait."

Because good values on Zenith and ofher leading television sets are being advertised every day by reputable merchants, you will probably be unable to tell the difference between legitimate price advertising sponsored by honest retailers, and the advertising sponsored by a "bait and switch" dealer. You won't have any trouble telling the difference when you visit the store, however.

You will find that the "bait and switch" dealer doesn't really want to sell you the Zenith or other national brand felevision set he used in his advertising to bring you into his store. When you enter the store, he may disparage the national brand he featured in his advertising or extol the virtues of some lesser-known brand that he didn't feature in his advertising. He may even tell you that the heavily advertised national brand is out of stock. That's the "switch."

The reputable merchant will be delighted that his advertising attracted you to the store and will be happy to sell you the Zenith or other leading television brand that he advertised.

The "bait and switch" retailer doesn't want to sell you the Zenith or other national brand television set he featured in his advertising because he can enrich himself by switching you to a lesser-known brand on which he makes more money. He didn't feature the lesser-known brand in his advertising because he knew it wouldn't attract you to his store.

What to do about it.

When you recognize that a retailer is attempting to "boil and switch" you can protect yourself best, and help protect other consumers plus the thousands of ethical television retailers, by simply turning around and walking out of the store. You'll have no trouble finding an honest television dealer amxious to earn your business.

We'd like to know, too.

If you discover a "bait and switch" operation involving Zenith products, please write us. With your permission, the details of your experience will be made available to the proper consumer protection agencies.

Thank you.

Why Does

ARR/

So Early?

That's a question that's often asked and deserves a sincere answer

The Intelligencer appreciates the spirit that prempts many of the objections to Christmas shopping promotions. However, when the reasons for the urge to "Shop Ently" are examined, the most critical agree it's MORE than a problem for stores chaos.

So we're happy to take this opportunity to present some of the problems that confront all stores at holiday time.

Every successful store directs its best efforts toward perfecting a helyful service to ALL its ensumers. And show many customers six stores to make it easier for them to complete their gift shopping before the crowded late November period, Christians merchandise and displays are brought forward early to accommendate them.

And scarcely a major store in the nation could cope with the store traffic that would be generated if any part of early Christmas shopping was postponed until the month of December. Even under present circumstances most stores are strained to capacity during the peak of the season, to maintain the kind of store service all aboppers have learned to expect When you recall the extremely crowded conditions of stores the final two or three weeks before Christmas the problems become evident.

If no early Christmas shopping were done
this condition would be multiplied
many field. Cartully there would not be
emorgh room behind the store counters
for enough sales people to serve shoppen
during the mostle of December.) The
name condition exists in regard to the
children with to Stante Clam. Thousand
of children and their parents look forward
to their annual visit with him, and
unless he makes an early appearance,
many hundred would be domoned to
disappointment, simply because it's
physically impossible to reach him in
a saberter time.

Those in the store business know that an extremely large percentage of the Christmas gifts that are selected are items that are in plentiful supply the entire year.

If you were to ask the thousands of retail employees, they would tell you that much of the stress and strain of their Christmas would be relieved if the shopping public would anticipate Christmas shopping throughout the year. (Then you'd seldom hear your friends in retailing remark "I'm simply worn to a frazzle by Christmas Eve".)

Granted that the problem is not a one-cided one. It should be recognized that stores are faced with the problems of convenient service to customers, of maintaining helpful employee relations, of providing a place where thoses of the public who cannot, or do not, plan ahead may select the traditional gift for their lavol ones and friends.

We are sure that if all our storekeepers could chat with you, personally and informally, that you would be convinced of their sincerity, and that in the true spirit of Christmas they would not be criticized for their efforts to perform a helpful lervice to their shopping public.

nong the positive, and what

It is no journey however, for anyone at of condition. Rugged, yes, but interests as and fulfilling.

The Best

If goes to show there is many a tacky place which has to pass muster for ing travellers such as Mr. Gromer, and it Belleville is one spot which they can re-with more than a little pleasure.

Girls and Sport

Cheericading is a fine old tradition for girls in Canadian schools, and we had ther proof of it in the recent contest ong area schools at Bayatde.

Could it be, however, that in these days energing self, stronger identity, and ching out for a more meaningful sense sommahood, that cheericading is somerged an annehronism?

go an assertentian?
Maybe that reeks too much of the heral. In any event the male teams always
their supporters, and if there were no
misaders, as such, there would be the
al fans, male and female, out there
ering the boys on.

At the same time, let's give all the oursgement possible to more team sport ticipation for the girls, as well as in such vidual realms as golf and tennia. Are there any budding Laura Baughts sillis Jean Kinga among us in Belleville?

Restraint

Actify of the times is Onlario Rydro's request for restraint in the use of energy in the form of Christians lights at the same times the word is that the province is irreligable the use of older energy as a backleaguing the use of older energy as a backleaguing the continued of pressure. Years of wurker use resources are existing up with the western world. In making the necessary cutbacks we are all learning a little delegibles, as well as contributing, hopefully, the one of shall energy should not be frivere.

The new Job Information Centres we're adding to Canada Manpower Centres coast to coast can help you

coast to coast can help you do just that:

If you're looking for a job, hey'll help you choose the job you really want.

And if you're an employer looking for someone to fil a job, they if help you find the person you need, faster.

First, if you're an employer, bob was the person you need, faster read, and it is not to the person you need, faster read, and they want to be person you need, faster was the person of the person you need, faster was the person of the person you need to be person of the pe

cording to occupational categories.

You pick the jobs that interest you. You decide. Our counsellors don't decide for you.

And your prospective employer knows this. At the interview, he knows you're there because you want to be, not just because the counsellor sent you.

sellor sent you.
If you're an employer,
you can see how this helps

you too. From now on the Canada Manpower staff will have more time to directly assist you in manpower planning and in solving particular employment problems. From

Canada Manpower Let's work together.

our training services to our tabour mobility programs, we can help effectively with your employment needs. All of which is our way of saying that major changes are going on at all Canada

Manpower Centres.
They'll help us all work together for the full employment of Canada's most important resource.

DEVELOPMENT .

I am in favor of downtown development including a new parking gar-age to help solve our parking problem, Pinnacle Street extension and bridge to algeriate north, south traffic congestion in the downtown core and the Camilifon Road underpass to speed up traffic passing the C.NR. tracks in the Camilifon area.

NEW ASSESSMENT

Belleville has an excellent record over the last 3 years. New assessment, in 1974 was at an all time high. This was accomplished by the Mayor and Goundl, the findustrial commission and the Chamber of Commerce working together to secur new commercial and industrial assessment. was a member of the industrial commission and tell Bis most important that we keep this fears working towards new assessment, see the contract that we keep this fears working towards new assessments to help keep our lax rates fashler.

initing irian for anxistance.

Mrs. Frumptre, a long-time Canadian ident, is from "down under," and in the mt fashlon of her countrymen abe inmaintaly is pressing home some home with on the food situation here in Canths on the food situation here in Can-

ada.

Advertisers have been her latest Larget.

Acknowledging that the board itself has often been criticised for "telling it like it is" to enstomers, Mrs. Plumptre said advertisers too must take their responsibilities and inform customers.

ers too must take their responsibilities and inform customers. "What she termed "mindless junky alo-guns" were the main target of her attack in an address to Montreal advertisers. She cited a number familiar to all of us. Someone needs to say these things, and Mrs. Flumpter is proving herself more than willing and able to perform the task."

As you can plainly see, fuel injection is to be found on some of the world's greatest cars. And, as you can also see, it's found on some of the world's most expensive cars.

However, from now on fuel injection will be standayd equipment on one of the world's greatest, least expensive cars. The 1975 Volta-wagen Beelle. And electronic tived linjection, or that.

In a nutshell, here's how our system works and here's whorl't does from your An electronic brain receives signals from the engine, evoluties those signals, and in split seconds, determines exactly how much fuel should go into each cylinder. And then, again in split seconds, the fuel injectors actually inject only the precise moment of gas.

With over 200 Shopers buy Mart stores from coest to coest, a special van was acquired and appro-priately named the Shoppers Drug Mart Mobile Academy Van. This van is able to travel to remote places and becomes an "instant classroom" in

In spare time, the Mobile Academy Van is used as a drop-in centre by community organizations such as Council on Drug Abuse, Miles For Millions, and the Family Planning

Future plans for the Koffler Acad-emy include full expansion of its ser-rices to all areas where Shoppers. Drug Mart stores are located.

Mr. Krakauer said use of audio-visual in-store programs are now being investigated so that each course can be presented to personnel directly in every Shoppers Drug Mart

There's a good chance that when you approach a Shoppers Drug Mert employee for assistance, you will be speaking to a Koffler Academy graduate who knows the value of a satis fied customer and will give you prompt, courteous and afficient

FITNESS - AND NO SWEAT by PETER R. ELSON: Physical fitness cannalbust.

Are you fed-up to here with reading about how you ought to exercise more. That Caredans are getting fat and lazy and are out of shape? And here you said that if the people who write that, do all the running around in a day that you do, they would reakte that there just inn't need in the file of an average homemabler, expectably with small childran, for more exercise.

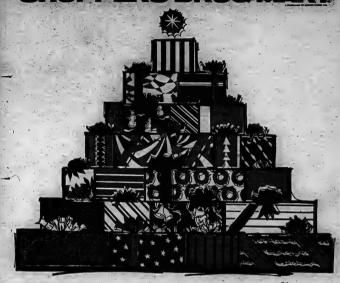

Exercise is a very important aspect of fitness, but another important part is the art of relaxation . . . release of tension. The homemaker's occupation is not only complex and challenging, but also creates much stress, stemming from a wide variety of sources but always resulting in the same physiologica response....an increase in the resting tension of the muscles in the body. This can lead to headaches, high blood pressure, and head/circulatory problems

The ability to relax is a tramendous asset for anyone who will take the effort to learn it and do it effectively. Just follow this simple procedure.

Lie down on a smooth surface such as a rug or hard bed. Tense your fitten relax them...then your lower legs...and work upwards, tensing malazing until you tense even the top of your head! Try to breathe even throughout.

Tense each muscle group for 3-5 seconds, and relax completely for a full 5 seconds after each "tense". This should give you a tremendous ennee of relaxation, both physical and mental, and well help you deal with pressures more affectively. If you do this whenever you feel tension building up, you will reduce the build up of residual tension, and you will feel much better.

Forget your inhibitions and do some slow rhythmical movements to some quiet music on the nation... (the lock will do them with you' and set if you can fit in some swigming or maybe a course of yoga. Any activity of a quiet nature which makes you feel good will encourage you to unwind, and in these days we need all the help we can get just to cope with each day as it comes along.

KEEP TAXES STABLE

I feel the spending on current and capital projects should be fe-assessed, in light of much higher costs than when the projects were planned and in view of much higher money interest costs, over the term of the debentures. I feel spending should be kept in line with moneys available to help keep our taxes stable.

Tough All Round

we to cope with today's complex world of the major concerns of our society. That, it is at least an undercurrent is constant and unremitting.

The current issue of Weshrad maga-es for one is devoted entirely to the sub-tor drivers. A number of writers, from the led Monitreal authority on stress, Dr. ms jelvy, to denint-area writer and poet Punty, contribute. And significantly, we is a travel hoset with the issue which, course, is all to do with getting-away-melt-all.

Stress is everywhere in the working sid including the wide open spaces of the n which today present the contradic-of urbanities seeking escape, on the one and, and life-long farm dwellers seeking to assured material rewards in the city, the other

"The simple life," says the introduc-ion a Mentreal Gonette article on the set, "is luring Montrealers away from set city streets and pseudo-cophistical-inner compinations. But cleam air and a not pase don't come easily or cheaply as are city dwellers in the Mastern Town-a have found."

According to the minister, those far a who remain on the job, have become i pendent on their neighbors and the co unity, more dependent on themselves a set machines.

But farm life has become faster-paced the threat of bankrupkry more immed-and devastating. Stress, he says, "has once a fact of life on many of our rural constons."

Siress though is an essential element human make-up: "the ever-lasting pt," as British writer Claud Cockburn e put it, without which no human pro-

once put it, without which no much gress is possible.

It's when it becomes too much, deepens and, as often happens, overwhelms a person, that there is trouble.

As for the new rural-urban dwellers, ey may provide more momentum than r. Stewart credits, such as Bette Stanley, Beeton, public relations expert turned m wife. Mrs. Stanley initiated a LTP sur-my of farm families in small communities

One thing the questionnaire has reveal-ed is that many of the older folk are set in their ways, and unable to see the other side of an argument. If new blood can provide fresh ideas and impetus down-on-the-farm, it will be all to the good.

Canada Too?

Terrorlim in Canada? Is it really pos-ble something of the kind would ever read to Canada?

There was the FLQ thing a few years ago. Ripped quickly in the bod though. But times are changing, and since then there has been an ominous growth of terrorism via such sinister groups as the IRA, the Patestrian I theration Organization, and others in Latin America.

Official Plan

Just as Rome was not built in a day, so the processes of planning for the future prolonged and fortuous.

But Believille now has an official plan has been through council and been ap-

It has taken time, but the result — a maleted planning program for the country — is cause for satisfaction.

alty — is came for antifaction.

Not that this is the last word on the unsert, It now goes to the provincial government for approval. But it is the maleus things to come, the base — barring the highly prospect or major alteration — for structure of the Betterflie of formorow.

Counties hours have goes him the barring the area production. He completion is a real as for the city.

There are side benefits to the plan, the capect for instance or more result; available grants, and this is good news in any networked or the city of benerow. All it is another red better day for Bellen, coming soon after amonement of the light development centered on the Four opners.

Not At Issue

Bection after successful civic election, the smightly little "Mayor of Foster Ward" draws substantial voling suport from peo-ple who believe he is a spokesman for the man in the street.

Unfortunately, at this week's sparsely-attended Hillcrest Meet-the-Candidates, Night, Alderman Keegan, by association, gave himself an election platform that he didn't really deserve.

Mr. Keegan, who happens to be the Belleville Xautment's Reacht Fund public-ity chalmain, chose the occasion to an-nounce that the Yardmen were going to break ground in April on a 2.5 million twin-arens project.

That bears no more relevance to Mr. search numbered election campaign than a smoonement of plans for the new four mers Century Square office development is to the campaigns of other altermanks opening, incumbent or otherwise.

There is a time and a place for every-hing, and Mr. Keegan's association of the fardmen's arena plan with his election ampaign was inappropriate in both res-

Black Dictatorships

The authoritarian nature of the African, almode to recently in Believille by South African information, attache Caris Landman, and manifested by the more than 50 countries on the continent governed by black dictatorables, has come to the fore again. This time in Ethlopia.

That there were inequalities in Sthiopia of that these had been perpetuated under 50 government of the Emperor Halls 5-4 size must be aknowledged. Tel it is quest-nable if this justified the mass ex-trition of 60 artistocraft and former officials at took place in recent days.

It takes us back to the days following let Castro's takeover in Cuba in 1959, ndreds were executed, although never in such ruthlessness—it is said a mach-gun@was used—as in this case.

Events have been moving swiftly in Shipois, and this laiset episode is alarming stidence of the kind of dictatorial rule that has become almost the norm among the in-dependent black nations.

Cost Factor

A comparison where the price of sugar concerned: a ten pound bag of sugar now its more than it does for a family of four, linding two small children, to dine out a restaurant.

DEVELOPMENT

I am in favor of downtown development including a new p age to help solve our parking problem, Financie Street ex-bridge to alleviate north, south traffic congestion in the dow and the Cumilton Road underpass to speed up traffic y CAR. tracks in the Camilton area.

NEW ASSESSMENT

Belleville has an excellent record over the last 2 years. New assemment to 1974 was at an all time high. This was accomplained by the Mayor and Council, the Industrial Commission and the Chamber of Commerce working together to accure new commercial and industrial lassessment. This last year we had a new plants under construction at one time. I member of the Industrial Commission and feel it is m at we keep this team working lowerds new agreement or tax rates shares

Oil Resources

with only an estimated seven yours to before our oil wells run dry, the big ques-m is "what then?"

will Canada, have to rely — a shaky emise where the Middle East is concerned on supplies from the Arab lands? And on enesuela, which already supplies Eastern

What about Minition, which recently re-ported significant finder Technique even Al-asian, but then we are phasing out exports to the United States so why should they sup-ply us? Then, they is Britain where the North Sea waters off Scottand promise sub-stantial amounts of oil. Will the UK have enough left over to export?

Lasily, there is Norway which former eiligencer reporter Brian Amaron, in a ent sritele for Canadian Press, points out mjoying an oil boom. He points out that nadian industries are trying to cash in

Amaron says Norway could be self-suf-ficient in oil by the end of the year and will start looking for export markets.

Ottawa would do well to look into pro-tis of importing oil from potentially new spilers such as Mexico and Norway.

Oil, like water, is an absolute necessity. And let's get on too with research into new mestic sources such as the Alberta tar nds. Time is running out.

Moira Clean-Up

Full marks to the St. Michael's Acade my students for their clean-up effort along banks of the Moira,

Goodness knows, a look at the river and Goodness knows, a book at the river and tisshis has never been the most inspiring sight in Belleville. By that we mean there always seems to be a dirty film on the sur-face, vigued from the Dundas Street bridge, or from Welcots Park, not to mention as-acrted junk and litter.

It is not the nort of thing of course that can be controlled by city or conservation authority recourses alone. The student ef-fort then is all the more commendable, and we hope if inspires other such initiatives by the young people.

Actually, it is not the first time stud-is have embarked on a task of this nature, are often than not, it takes the young-rs, when they are something like this that eds righting, to do something about it.

African Trends

After the executions in Bithlopis, what about events to the south where the South Africans are plugging away with their poli-ey of apartheid, or as they prefer it to be known, "separate parallel development."

The four million or so whites are in charge, but the aim is self-determination also for the dozen or so black groups (each a tribal minority in itself), in the "home-lands" (like Indian reserves here), and some form of self-rule for the coloreds (mixed race) and Asians.

A yet there is no sign of open oppo-ition against the system. Indeed, a Canci-ian-born woman, Mabel E. Agar, of Piefer-maritaburg, wrote to The Toronto Star leat-summer, in these terms: "The uply features of apartheid are on the way out ... while in South Arries. I have been struck by the good order than the structure of the pro-toring project." And this, based on 40 pearly reddence there.

Sure, the authorities keep a tight rein on things in South Africa, but what is the atternative? Something like what has hap-pened in Ethiopia, or the dictatorathips of Uganda and other independent black states?-Better to liye and let live, which is the in-tent of current talls between the South Af-rican and Zambian governments.

CANDIDATE FOR REEVE OF AMELIASBURG TOWNSHIP OFFERS A SINCERE DESIRE TO SERVE THE PEOPLE WITH EXPERIENCE AND INTEGRITY.

To clarify some remark#that have been made.

1. I have no desire to change the local form of municipal government as it now exists.

I would rather see PRINCE EDWARD COUNTY, and par-ticularly AMELIASBURG TOWNSHIP stay as it is instead ning a small part of a large region.

3. I will not support any type of re-organization of local gov-ernment unless I feel it is absolutely necessary to retain the identity of our municipality.

MOST POWERFUL CHASSIS IN ZENITH HISTORY!

FAMOUS ZENITH QUALITY THROUGH AND THROUGH!

COLOR SETS FROM \$389.

SEE THEM TODAY AT

A message to color television buyers.

Don't be the victim of a selling tactic called "bait and switch."

Over 5,000 retailers sell national brand television sets in Canada. The over-whelming majority are business people of integrity-people you can rely on when purchasing television sets or other home entertainment products. A small number of television dealers, unfortunately, are not responsible representatives of the television retailing profession. These dealers sell national brand television sets through the use of an unfair and, in some instances, illegal selling tactic called "bait and switch." Their purpose, simply stated, is to enrich themselves at the expense of unsuspecting television buyers.

Here's what "bait and switch" is, how you can be on guard against it, and how you can help stamp it out altogether.

What is "bait and switch"?

A dealer using "bait and switch" will start by advertising a nationally respected television brand at a very low price, to attract you into his store. The advertised brand may well be a Zenith, because of the high level of public regard the Zenith brand has earned. The advertised set and its low price are the "bait."

Because good values on Zenith and other leading television sets are being advertised every day by reputable merchants, you will probably be unable to tell the difference between legitimate price advertising sponsored by honest retailers, and the advertising sponsored by a "bait and switch" dealer. You won't have any trouble telling the difference when you visit the store, however.

You will find that the "bait and switch" deader doesn't really want to sell you the Zenith or other national brand television set he used in his advertising to bring you into his store. When you enter the store, he may disparage the national brand he featured in his advertising or extol the virtues of some lesser-known brand that he didn't feature in his advertising. He may even tell you that the heavily advertised antional brand is out of stock. That's the "switch."

The reputable merchant will be delighted that his advertising attracted you to the store and will be happy to sell you the Zenith or other leading television brand that he advertised.

The "bait and switch" retailer doesn't want to sell you the Zenith or other national brand television set he featured in his advertising because he can enrich himself by switching you to a lesser-known brand on which he makes more money. He didn't feature the lesser-known brand in his advertising because he knew it wouldn't attract you to his store.

What to do about it.

When you recognize that a retailer is attempting to "bait and switch" you can protect yourself best, and help protect other consumers plus the thousands of ethical television retailers, by simply turning around and walking out of the store. You'll have no trouble finding an honest television dealer amxious to earn your business.

We'd like to know, too.

If you discover a "bait and switch" operation involving Zenith products, please write us. With your permission, the details of your experience will be made available to the proper consumer protection agencies.

Thank you.

When was the last time vou stood up and applauded a movie?

When was the last time you were so impressed and involved that you spontaneously cheered? At previews everywhere across the country, audiences have responded with a thunderous reaction to "Walking Tall." ADULT

It is the deeply moving, contemporary story of a young man who wouldn't surrender to the System... and the girl who always stood beside him.

"Walking Tall" is based on the truth and it isn't "just a movie."

"Might just turn out to be this year's sleeper and emulate the runaway success of 'BILLY JACK."
